

5th Erlangen Workshop on Microforming

November 23rd, 2010

1st Announcement

Microforming

process

tool

machine

application

organized by
Chair of Manufacturing Technology

**Friedrich-Alexander-Universität
Erlangen-Nürnberg**

Focus

On November 23rd, 2010 the Chair of Manufacturing Technology will host the Workshop on Microforming in Erlangen. The ongoing trend towards miniaturisation of technical products is still unbroken and also the economical manufacturing of smallest metallic components by forming processes is still challenging. The first workshop took place in 2002 as a result of the impressive number of scientific projects started all over the world with various objectives concerning forming processes at microscale. In the following workshops topics like the development of models to predict the material behaviour, the design of machines and tools meeting the specific requirements of microforming supported the extending of knowledge among the participants. After these years of basic research and industrial approaches, there are new solutions, industrial applications and new visions.

We would like to invite you to attend the 5th Erlangen Workshop on Microforming to provide a forum for industry and academia for the exchange of knowledge, information, experience and results as well as the review of progress and discussion of the state-of-the-art and future trends in microforming technology. You will get the opportunity to catch up on information of the latest developments and to get into contact with colleagues from industry and research.

We would appreciate your participation.

Prof. Dr.-Ing. Marion Merklein

Prof. Dr.-Ing. Ulf Engel

Invited speakers

Prof. Dr.-Ing. Frank Vollertsen

BIAS GmbH, Germany

Thomas Gmelin

ECMTEC GmbH, Germany

Dr. Andrzej Rosochowski

University of Strathclyde, UK

Rasmus Solmer Eriksen

IPU, Denmark

Prof. Dr.-Ing. Bernd Kuhfuß

bime, Germany

Christian Thomsen

Elos-Pinol A/S, Denmark

Location

The conference will take place in Erlangen, which is located in northern Bavaria (Germany), about 20 km north of Nuremberg and about 200 km north of Munich. Erlangen offers a large number of hotels ranging from small cozy family run hotels to international standard first class hotels. Special rates for delegates will be available.

Further information

For up-to-date information concerning the 5th Erlangen Workshop on Microforming please visit our website:

<http://www.lft.uni-erlangen.de/MUT>

There you will find recent news about the location, the fee, presenters and a detailed program as it becomes available. You can also announce your interest to attend the workshop.
